APPENDIX 3
DESIGN CONCEPT

PROJECT: SERVICED APARTMENT COMPLEX, Yangon, Myanmar

I. BASIC DESIGN CONCEPT

To provide a comfortable, relaxing and yet classy living environment for the residents of the complex;

The weather in Yangon plays a major role in our design. With the year round tropical weather ever so slightly changing, our design creates a living atmosphere to take advantage of the weather and enjoy it.

KEY DESCRIPTION: Light, Shadow and Air

Light

The bursting rays of the sun will light up the swimming pool and spacious patio area. The sunlight will also add color to the lush greenery and beautiful tropical flowers which will be planted around the patio and act like a private garden enclosure.

Shadow

Shadows will be made well use of to provide a cool, shady area to contrast with the brightly lit patio area. The apartment complex will be covered with deep eaves and have large, deep balconies to protect each unit from unwelcome rays of sunlight and provide a cool shaded area in each room. This contrast of brightness and shadow will provide a comfortable relaxed feeling.

Air

The housing blocks will be strategically arranged to welcome and use the natural tropic breeze to flow through and cool the corridors of the apartment. The corridors to each unit will be open air to allow the natural breeze to circulate the sweet smells from the garden. The corridors will overlook the view of the patio and swimming area.

II. SERVICES PROVIDED

1. Cafeteria

This will be a casual dining area on the first floor with access from the patio and views of the pool and garden to enjoy. Breakfast and light meals will be served. The cafeteria is created with the thought of convenience for single residents in mind.

2. Maid Service

This service will be available for the residents who do not have time to take care of household chores such as cleaning, changing linen, shopping and valet laundry service.

3. Business Center

This will be located adjacent to the entrance hall. It will be stocked with the latest, fully automated office services such as personal computers, fax machines, and copy machines. If necessary, secretarial service will also be made available.

4. Fitness Center

This area will be equipped with state-of-the-art exercise machines, a squash court and an aerobic studio with cushioned flooring to help prevent injuries. Each area will be equipped with a high quality sound system and the aerobic studio will be fully mirrored. The fitness center will be conveniently located near the cafeteria for residents who need an after workout fruit drink or healthy snack. The fitness center will also be equipped with full shower and locker facilities as well as a men's and women's dry sauna. Keep in shape!

5. Outdoor Swimming Pool

Located in the middle of the patio, this oval shaped pool will be arranged with a spacious pool deck area and surrounded with a green garden. The pool water will be purified water, and the most modern, advanced water filtration and circulation system will be installed. The pool itself will be equipped with underwater lights and sound system. It is at the pool area that we hope residents will use as a meeting place for social gatherings.

6. Lighting System

The garden area and patio will be lit efficiently by Borrados, low post garden lights. The outside corridor of the walkways will be lit dramatically by wall brackets and ceiling down lights. The light source, specially for outdoor lighting, will be carefully selected so as not to attract flying insects in the evening.

II. SERVICES PROVIDED, cont.

7. Security System

To maintain high maximum security for the residents, an electronic automated lock system will be introduced. The main entrance door on the first floor, and every entry door to the lift lobbies on the basement floor will be automatically locked with a cardkey system opening or command opening from each unit.

In addition to 24 hour security guards patrolling the complex, a cardkey gate system will be employed at the entry of the car park.
